Baya Khouini

Software Engineering Student · Full Stack & AI

Tunis, Tunisia · baya.khouini@esprit.tn · github.com/batta0102 · linkedin.com/in/baya-khouini-5a0387255

6-month end-of-studies internship · Available from December 2026 · International agreement via ESPRIT · Open to France & Europe

PROFILE

Final-year engineering student at ESPRIT (Software Architecture Engineering). I have designed multi-agent AI architectures and a RAG chatbot, and put a mobile app into production on my own.

EXPERIENCE

AI Engineer, part-time

Hypefury · Oct 2026 – present

- AI post-generation pipeline (Gemini, Vercel AI SDK) for Threads, Bluesky and LinkedIn, based on the user's own style
- Reliable LLM outputs: Zod validation, guided retries, pgmq queue (Supabase), Sentry tracing; Nuxt 3 / Vue 3, TypeScript, Playwright tests

Intern, multi-agent AI platform for ticket classification and SLA tracking

BTAFC · Aug – Sept 2026

- Designed and built alone a multi-agent architecture (CrewAI, GPT-4o via Azure OpenAI) to classify, audit and assign ServiceNow tickets
- 4-agent pipeline with confidence scoring, alongside a deterministic Python scoring engine
- Built the API Gateway (FastAPI, Keycloak PKCE/JWT) and a real-time React dashboard (Kanban, SLA tracking)

PROJECTS

Go4it, sports social mobile app

Freelance · Aug 2025 – Jan 2026

- Built alone in TypeScript (React Native, Node/Express, MySQL) and shipped to production
- Fixed an N+1 query problem: up to 95% fewer queries per request
- Jenkins CI/CD, Kafka for real-time notifications, Prometheus/Grafana monitoring, production cutover

Smart Campus AI, university management and skill matching

Team project · Sept 2026 – present

- RAG chatbot (React widget, Express/JWT API, FastAPI service, Chroma/FAISS retrieval, Ollama/OpenAI embeddings, grounded answers)
- Skills ↔ opportunities matching (embeddings) and an LLM learning-path generator (strict JSON Schema output)

Jungle in English, AI learning platform

Team project · Jan – June 2026

- Scrum Master for a team of 7: Agile management in Jira, linked to GitHub and Jenkins, automated Slack notifications
- Course recommendation, optimization (PuLP) and k-means clustering in Python; secured Spring Boot APIs

Ride With Me, carpooling mobile app

Team project

- Flutter app with booking, Flouci payment and real-time tracking, on PostgreSQL
- Owned the user, ride-offer and review modules (front end and back end)

EDUCATION

ESPRIT, School of Engineering · Software Engineering, Software Architecture Engineering specialization · 2023 – June 2027

INSAT · Integrated preparatory cycle · 2021 – 2023

Lycée La Marsa Saada · Baccalaureate, with honors · 2021

SKILLS

Languages & backend	Python, TypeScript, JavaScript, Java, C, C++ · Node.js/Express, FastAPI, Spring Boot, REST APIs
Front & mobile	React, Vue.js/Nuxt, React Native, Flutter, Angular
Data	PostgreSQL, Supabase, MySQL, MongoDB, SQL
AI	CrewAI, Gemini, Azure OpenAI/GPT-4o, OpenAI API, RAG, scikit-learn
Cloud & DevOps	AWS, Docker, Kubernetes, Jenkins, GitHub Actions, Kafka, RabbitMQ, Prometheus, Grafana · Git, Jira, Agile (Scrum Master)

CERTIFICATIONS & LANGUAGES

AWS Academy Graduate – Cloud Foundations (Nov 2026) · Hedera Certified Developer Associate, Hedera Certified Foundation, Hedera Business Foundation (Nov 2026)

English, French, Turkish (fluent) · Arabic (native) · Spanish (basic) · Leo Club, AIESEC, Lions Club
